

its designated representative must be made available to APHIS upon request.

(f) *Cold treatment.* The fruit, except for limes (*C. aurantiifolia*), must be cold treated for *Anastrepha fraterculus*, *A. obliqua*, *A. serpentina*, and *Ceratitis capitata* (Mediterranean fruit fly) in accordance with part 305 of this chapter.

(g) *Phytosanitary inspection.* Each consignment of fruit must be accompanied by a phytosanitary certificate issued by the NPPO of Peru stating that the fruit has been inspected and found free of *Ecdytolopha aurantiana*.

(h) *Port of first arrival sampling.* Citrus fruits imported from Peru are subject to inspection by an inspector at the port of first arrival into the United States in accordance with § 319.56–2d(b)(8). At the port of first arrival, an inspector will sample and cut citrus fruits from each shipment to detect pest infestation. If a single live fruit fly in any stage of development or a single *E. aurantiana* is found, the shipment will be held until an investigation is completed and appropriate remedial actions have been implemented.

§ 319.56–2qq Administrative instructions; conditions governing the entry of peppers from the Republic of Korea.

Peppers (*Capsicum annuum* L. var. *annuum*) from the Republic of Korea may be imported into the continental United States only under the following conditions:

(a) The peppers must be grown in the Republic of Korea in insect-proof greenhouses approved by and registered with the National Plant Quarantine Service (NPQS).

(b) The greenhouses must be equipped with double self-closing doors, and any vents or openings in the greenhouses (other than the double self-closing doors) must be covered with 0.6 mm screening in order to prevent the entry of pests into the greenhouse.

(c) The greenhouses must be inspected monthly throughout the growing season by NPQS to ensure phytosanitary procedures are employed to exclude plant pests and diseases, and that the screens are intact.

(d) The peppers must be packed within 24 hours of harvest in a pest-exclusionary packinghouse. During the time the packinghouse is in use for exporting peppers to the continental United States, the packinghouse can accept peppers only from registered approved production sites. The peppers must be safeguarded by an insect-proof mesh screen or plastic tarpaulin while in transit from the production site to the packinghouse and while awaiting packing. The peppers must be packed in insect-proof cartons or containers, or covered with insect-proof mesh or plastic tarpaulin, for transit to the continental United States. These safeguards must remain intact until the arrival of the peppers in the United States or the shipment will not be allowed to enter the United States.

(e) Each shipment of peppers must be accompanied by a phytosanitary certificate of inspection issued by NPQS bearing the following additional declaration: “These peppers were grown in greenhouses in accordance with the conditions in 7 CFR 319.56–2qq and were inspected and found free from *Agrotis segetum*, *Helicoverpa armigera*, *Helicoverpa assulta*, *Mamestra brassicae*, *Monilinia fructigena*, *Ostrinia furnacalis*, *Scirtothrips dorsalis*, *Spodoptera litura*, and *Thrips palmi*.”

(f) The peppers must be imported in commercial shipments only.

§ 319.56–2rr Administrative instructions; conditions governing the importation of untreated grapefruit, sweet oranges, and tangerines from Mexico for processing.

Untreated grapefruit (*Citrus paradisi*), sweet oranges (*Citrus sinensis*), and tangerines (*Citrus reticulata*) may be imported into the United States from Mexico for extracting juice if they originate from production sites in Mexico that are approved by APHIS because they meet the following conditions and any other conditions determined by the Administrator to be necessary to mitigate the pest risk that such fruits pose:

(a) *Application of sterile insect technique.* Production sites, and a surrounding 1.5 mile buffer area, must be administered under an APHIS-approved preventative release program using sterile insect technique for the Mexican fruit fly (*Anastrepha ludens*).

(b) *Fruit fly trapping protocol.* (1) *Trapping densities.* In areas where grapefruit, sweet oranges, and tangerines are produced for export to the United States, APHIS approved traps and lures must be placed in production sites and a surrounding 1.5 mile buffer areas as follows:

(i) For Mexican fruit fly (*Anastrepha ludens*) and sapote fruit fly (*A. serpentina*): One trap per 50 hectares.

(ii) For Mediterranean fruit fly (*Ceratitidis capitata*): One to four traps per 250 hectares.

(2) *Fruit fly catches.* Upon trapping of a Mexican fruit fly, sapote fruit fly, or Mediterranean fruit fly in a production site or buffer area, exports from that production site are prohibited until the Administrator determines that the phytosanitary measures taken have been effective to allow the resumption of export from that production site.

(3) *Monitoring.* The trapping program must be monitored under an APHIS-approved quality control program.

(c) *Safeguarding.* Fruit must be safeguarded against fruit fly infestation using methods approved by APHIS from the time of harvest until processing in the United States.

(d) *Phytosanitary certificate.* Each shipment must be accompanied by a phytosanitary certificate issued by Mexico's national plant protection organization that contains additional declarations stating that the requirements of paragraphs (a), (b), and (c) of this section have been met.

(e) *Ports.* The harvested fruit may enter the United States only through a port of entry located in one of the Texas counties listed in § 301.64–3(c) of this chapter.

(f) *Route of transit.* Harvested fruit must travel on the most direct route to the processing plant from its point of entry into the United States as specified in the import permit. Such fruit may not enter or transit areas other than the Texas counties listed in § 301.64–3(c) of this chapter.

(g) *Approved destinations.* Processing plants within the United States must be located within an area in Texas that is under an APHIS-approved preventative release program using sterile insect technique for Mexican fruit fly.

(h) *Compliance agreements.* Processing plants within the United States must enter into a compliance agreement with APHIS in order to handle grapefruit, sweet oranges, and tangerines imported from Mexico in accordance with this section. APHIS will only enter into compliance agreements with facilities that handle and process grapefruit, sweet oranges, and tangerines from Mexico in such a way as to eliminate any risk that exotic fruit flies could be disseminated into the United States, as determined by APHIS.

§ 319.56–2ss Conditions governing the entry of grapes from Namibia.

Grapes (*Vitis vinifera*) may be imported into the United States from Namibia only under the following conditions:

(a) The grapes must be cold treated for *Cryptophlebia leucotreta*, *Ceratitidis capitata*, *Ceratitidis rosa*, and *Epichoristodes acerbella* in accordance with part 305 of this chapter.

(b) The grapes must be fumigated for *Aleurocanthus spiniferus*, *Apate monachus*, *Bustomus setulosus*, *Ceroplastes rusci*, *Cryptoblabes gnidiella*, *Dischista cincta*, *Empoasca lybica*, *Eremnus atratus*, *Eremnus cerealis*, *Eremnus setulosus*, *Eutetranychus orientalis*, *Helicoverpa armigera*, *Icerya seychellarum*, *Macchiademus diplopterus*, *Oxycarenus hyalinipennis*, *Pachnoda sinuata*, *Phlyctinus callosus*, *Scirtothrips aurantii*, *Scirtothrips dorsalis*, *Spodoptera littoralis*, and *Tanyrhynchus carinatus* in accordance with part 305 of this chapter.

(c) Each shipment of grapes must be accompanied by a phytosanitary certificate of inspection issued by the national plant protection organization of Namibia bearing the following additional declaration: “The grapes in this shipment have been inspected and
